

GALVANIC SURFACE FINISHING

At Bruse, the customer receives their individual product including the final coating in our in-house electroplating shop.

to your wishes we carry out mechanical surface refinements such as grinding and polishing.

Nickel plating of rack or drum goods, chrome plating as well as tinning and copper plating of components takes place in our electroplating shop.

Other surfaces are available on request.

TIN PLATING - Property: Food compatibility

NICKEL PLATING - Property: Resistant to air and water

COPPER PLATING - Property: very good heat and conductivity
